TECHNICAL SUMMARY

Computer Science student at California State University San Marcos pursuing a B.S. in Computer Science with a minor in Mathematics. Seeking internships in embedded systems, IT/infrastructure, or software development. Hands-on experience with Java/C++ OOP and data structures, Python AI/API workflows, Linux/Docker homelab administration, and introductory embedded development.

SKILLS

Languages: Java, C++, Python, C

Systems / Infrastructure: Linux, Docker / Docker Compose, SSH, Tailscale, Borg, UFW

Development: Git, VS Code, IntelliJ IDEA, Vim/Neovim (learning)

Data / AI: pandas, matplotlib, Mistral API, yfinance, PyMuPDF

Concepts: Object-Oriented Programming, data structures, MVC; SQLite/JDBC and Kubernetes/k3s (learning)

EDUCATION

California State University San Marcos - B.S. Computer Science, Minor in Mathematics | Expected Graduation: December 2028

Palomar College - Computer Science A.A. | GPA: 3.57

TECHNICAL EXPERIENCE

Embedded Systems Intern - RRT Electronics, San Diego, CA | Summer 2025

- Set up the development environment for a TI C2000 F28P65x LaunchPad and completed initial embedded C firmware tests.
- Researched watchdog timer behavior and TI documentation; used Git while working with firmware and development files.

Network Configuration - La Jolla, CA | March 2026

- Configured a working network environment for a crew-based operational setup and troubleshooted device connectivity.

PROJECTS

Personal Homelab / Server Infrastructure - Linux, Docker, ZFS, Borg, Tailscale

- Administer a three-machine Linux homelab running Docker Compose services, including Immich and automated Borg laptop-to-server backups.
- Configure SSH keys, Tailscale remote access, ZFS-backed storage, and basic UFW rules; troubleshoot ports, processes, packages, journalctl logs, and Docker logs.
- Testing Kubernetes/k3s with sample workloads as a step toward distributing services across multiple machines.

Habit Tracker Desktop Application - Java / JavaFX / MVC | CSUSM Group Project

- Collaborating on a JavaFX habit-tracking application using MVC; share responsibility for UML/system design, Git coordination, and database planning.
- Designing SQLite-backed persistence for recurring habits, schedules, and completion history as the project develops.

Kitchen Inventory & Weekly Simulation - Java

- Built an object-oriented simulation for inventory, menu planning, expiration tracking, FIFO usage, demand, waste, and restocking.

Financial AI Report Generator - Python / Mistral API

- Built a Python pipeline that downloads economic PDFs, extracts text with PyMuPDF, and summarizes content using the Mistral API.
- Retrieved S&P 500 data with yfinance/pandas, calculated returns, created matplotlib comparisons, and generated PDF reports with FPDF.

WORK EXPERIENCE

Server/Cook - Pacifica Retirement Home | 2023-2026

- Managed high-volume service operations, trained new staff, resolved operational issues, and maintained food-safety procedures.

Self-Employed Math Tutor - 2020-2023

- Tutored students ages 11-15 in step-by-step mathematical problem-solving and tracked progress over time.
