TECHNICAL SUMMARY

Computer Science A.A. student transferring to a four-year university (Spring 2026).
Seeking part-time or internship roles in software development, embedded systems, or IT.
Experience with Java simulations, Python data pipelines, embedded C firmware, and
Linux/Docker troubleshooting.

SKILLS

Languages: Java, Python, C, C++

Systems: Linux (Debian/CasaOS), Docker, SSH, Tailscale

Data / AI: pandas, matplotlib, API integration, PDF generation, AI-assisted summarization

Tools: Git, Google Colab

TECHNICAL EXPERIENCE

Embedded Systems Intern (C / Firmware)

RRT Electronics — San Diego, CA 92127 | Summer 2025

- Programmed embedded C firmware on TI LaunchPad (C2000 F28P65x) development kit
- Worked with low-level firmware related to power delivery and control logic
- Used Git for version control while iterating on embedded code
- Operated in a self-directed environment with limited documentation

PROJECTS

Kitchen Inventory & Weekly Simulation (Java)

- Built an object-oriented simulation modeling kitchen inventory, menu planning, and weekly operations
- Implemented ingredient expiration tracking and FIFO-style usage logic
- Simulated demand, revenue, waste, and restocking over multi-day cycles
- Identified memory pressure caused by object lifecycle mismanagement

Financial AI Report Generator (Python)

- Extracted and summarized economic outlook reports from PDFs using an AI API
- Pulled market data (S&P 500) and calculated multi-year returns using pandas and yfinance
- Generated comparative charts with matplotlib and compiled a structured PDF Reports

WORK EXPERIENCE

Server — Pacifica Retirement Home | 2023-2026

- Managed high-volume service operations and trained new staff
- Solved operational and facility issues through structured problem-solving

Self-Employed Math Tutor | 2020-2023

- Tutored students ages 11-15, teaching step-by-step problem-solving and tracking progress

EDUCATION

Palomar College — Computer Science A.A.

GPA: 3.57 | Transferring Spring 2026
